FORMATIVE EVALUATION 1 • LV125E

CEFR B2 • 20 POINTS

Session 7 Lesson Worksheet: Flipped Classroom Peer-Teaching Workshop

Student teams of 3 to 4 take the floor as technical aviation instructors to deliver an engaging 30-minute interactive lesson to classmates based on Module 1 EASA aerodrome operations.

TRACK & MODULE	SESSION DURATION	DELIVERY FORMAT	CONTINUOUS ASSESSMENT
AT • Module 1 (LV125E)	2 Hours (30-Min Lessons)	Teams of 3 to 4 Students	FE1 Graded out of 20

1. Executive Summary & Professional Aviation Relevance

Teaching a complex technical subject to others is one of the most effective ways to solidify language mastery and professional communicative presence. In airside operations, civil aviation oversight, and flight operations management, future ENAC graduates are regularly required to deliver safety briefings, train frontline ground teams, explain complex EASA regulatory updates, and facilitate collaborative decision-making across international teams.

Developing the confidence to give direct spoken instructions, facilitate interactive peer discussions, and think on your feet in English transforms passive technical knowledge into active leadership communication. In this session, student pods lead 30-minute interactive workshops, practicing instruction delivery, checking understanding, table coaching, and leading plenary debriefs.

2. Five Core Spoken Communicative Objectives (CEFR B2 Level)

OBJ 01 Structure a 30-Min Lesson
Lead an engaging, well-timed lesson on an authentic EASA aerodrome topic without reading from scripts or notes.

OBJ 02 Deliver Clear Instructions (ICQs)
Give direct step-by-step instructions in plain B2 English and use Instruction Checking Questions before group work.

OBJ 03 Facilitate Spoken Interaction
Circulate among student pairs, prompt active discussion, provide helpful hints, and maintain an English-only atmosphere.

OBJ 04 Deploy Module 1 Aerodrome Terms
Naturally integrate 6 to 8 specialized technical terms (OLS, SIB, derogation, Level 1 non-compliance, CAP, Swiss Cheese).

OBJ 05 Lead Plenary Debrief & Peer Feedback
Synthesize group findings, invite peer questions, conduct honest self-evaluation, and deliver constructive spoken feedback.

3. Worksheet Structure & Table of Contents

PAGE	CORE LEARNING SECTION	PROFESSIONAL FOCUS & PRACTICAL SPOKEN OUTCOME
Page 1	Cover, Objectives & Index	Course metadata, executive summary, 5 B2 communicative goals, roadmap.
Page 2	Part 1: Entry Diagnostic & Part 2: Architecture	4 spoken facilitation spot-checks + 4-stage 30-minute lesson delivery design.
Page 3	Spoken Facilitation Toolkit & Language Clinic	Direct instructions, ICQs, table coaching, debrief phrases + 5 spoken drills.
Page 4	Official 20-Point Marking Rubric & Bands	4 evaluation criteria (5 pts each) + 4 CEFR B2 performance standards.
Page 5	Peer Observation & Scoring Matrix	Live evaluation scorecards for student pods evaluating presenting teams.
Page 6	Activity 5: Safety Check Decision Table	Systemic communication risks, briefing failures, and EASA risk controls.
Page 7	Activity 6: Portfolio Integration & Sign-Off	Self-reflection, teacher feedback targets, top 10 vocabulary & FE1 sign-off.

Part 1: Entry Diagnostic Spot-Check — Spoken Facilitation & Instruction Techniques

Before teams take the floor, test your spoken facilitation knowledge with these 4 quick-fire spot-check questions on instruction checking, active monitoring, pacing, and debriefing.

Q1: Instruction Checking Questions — CLARITY CHECK

What is an ICQ, and why is asking "Do you understand?" ineffective?

Model Answer: An ICQ verifies specific task parameters (e.g., *"Are you working in pairs or alone?"*, *"How many minutes do you have?"*). Asking *"Do you understand?"* produces reflexive nods without confirming comprehension.

Q2: Active Table Coaching — GROUP MONITORING

What should student instructors do while classmates work in pairs?

Model Answer: Instructors circulate actively among tables to listen to discussions, clarify ambiguities, prompt quieter students with guiding questions, and maintain an English-only atmosphere without interrupting unnecessarily.

Q3: Timebox Management — PACING CONTROL

How should a team manage the 30-minute timebox if an activity runs over?

Model Answer: Issue a clear spoken time warning (*"Two minutes remaining, please finalize conclusions"*), accelerate transition to debrief, and nominate specific teams for highlights rather than hearing every pair.

Q4: Plenary Debrief Quality — CLASS SYNTHESIS

What makes a plenary debrief effective in technical English?

Model Answer: An effective debrief synthesizes peer discoveries, elicits contrasting solutions, highlights accurately deployed aerodrome phraseology, and gives immediate actionable feedback rather than simply reading slides.

Part 2: The 30-Minute Flipped Lesson Architecture (4 Stages)

Zero rigid minute breakdowns. Each team determines its internal dwell time and discussion pacing according to peer engagement and communicative flow:

STAGE 1 — OPENING PHASE

Welcome & Context Hook

Introduce your team of instructors and set the real-world aerodrome scenario. Hook peer curiosity with a compelling problem:

- State clear, plain-language session goals (e.g. *"Today we evaluate Runway 14L friction loss"*).
- Display a visual exhibit (photo, diagram, or NOTAM extract).
- Ask an opening engagement question to activate background knowledge.

STAGE 2 — CORE ACTIVITY

Instructions & Spoken Task

Deliver step-by-step instructions in plain B2 English before breaking classmates into pairs or small groups:

- Use numbered imperatives (*"Step 1: identify the hazard. Step 2: draft mitigation"*).
- Ask 2 to 3 targeted ICQs before saying "begin".
- Designate partner roles (e.g. Aerodrome Inspector vs. Airside Operations Manager).

STAGE 3 — ACTIVE COACHING

Circulating & Table Support

All team instructors split across the room to support, monitor, and coach student pairs:

- Circulate between tables; avoid standing together at the front whiteboard.
- Prompt quieter learners with guiding questions (e.g. *"What does Part-ADR require?"*).
- Gently re-channel French discussions back into professional English.

STAGE 4 — DEBRIEF PHASE

Plenary Review & Debrief

Bring the whole class together to compare solutions, synthesize insights, and celebrate communicative success:

- Nominate specific tables to share their primary safety recommendations.
- Recap the core technical distinction (e.g. Level 1 immediate closure vs Level 2 CAP).
- Thank classmates for active participation and invite peer questions.

Student Instructor Planning Notes: 30-Minute Lesson Outline

Opening Hook & Scenario chosen:	Interactive Spoken Task for Classmates:

Spoken Facilitation Toolkit — Phrases for Student Instructors

Deploy these practical, natural B2 phrases during your 30-minute delivery to direct the room, check understanding, coach pairs, and lead the debrief:

📣 1. OPENING HOOK & INSTRUCTIONS

- *"Good morning everyone. Today our team is putting you in the shoes of airport safety managers..."*
- *"Our primary objective by the end of this 30-minute session is to agree on..."*
- *"Please work in pairs with the person sitting next to you."*
- *"Step one is to examine the chart. Step two is to identify the non-compliance."*

❓ 2. INSTRUCTION CHECKING QUESTIONS (ICQS)

- *"Before we start, who can explain what you need to do in step 1?"*
- *"Are you working individually or in pairs?"*
- *"What should your team have written down when time is up?"*
- *"You have 8 minutes for this phase. Any questions before we start?"*

👥 3. CIRCULATING & TABLE COACHING

- *"How are things progressing over here? Any questions on the regulatory rule?"*
- *"What does EASA Part-ADR state about temporary obstacle exemptions?"*
- *"Try using 'provided that' to express the conditional safety measure."*
- *"Two minutes remaining, everyone. Please start wrapping up your notes."*

🎯 4. PLENARY DEBRIEF & ELICITING

- *"Let us hear from Team B. What root cause did your group identify?"*
- *"Did any other team reach a different conclusion for this audit finding?"*
- *"To recap, the key technical distinction between Level 1 and Level 2 is..."*
- *"Great participation everyone. Thank you for your active engagement."*

Language Clinic: Spoken Facilitation & Instruction Drills

Transform hesitant, vague teacher talk into direct, confident spoken instructions:

FACILITATION SCENARIO	❌ HESITANT / VAGUE SPOKEN ENGLISH	✅ PLAIN B2 FACILITATION (DIRECT & CONFIDENT)
1. Directing Pairwork & Steps Step sequencing	*"Maybe you can look at the paper and see what is wrong, do it with someone."*	**"Please work in pairs. Step one: examine the obstacle limitation surface on page 3. Step two: circle the antenna penetration. You have four minutes."**
2. Formulating ICQs Verifying comprehension	*"Do you understand the activity?"*	**"Before we begin: Sarah, how many root causes does your pair need to write? Exactly, three. And David, how much time do you have? Six minutes."**
3. Table Coaching & Hints Guiding stuck students	*"Why are you not talking? You must write the answer."*	**"How is it going over here? Look back at EASA Part-ADR.OR.D.005: does this containment failure pose an immediate hazard to flight operations, or can it be managed within 30 days?"**
4. English Immersion Reminder Encouraging English	*"No French, English please!"*	**"Remember everyone, 100% English only. If you need the word for 'brise-souffle', it is 'jet blast deflector'. Keep the discussion in English!"**
5. Transition to Debrief Nominating speakers	*"Okay time is up. Who wants to talk?"*	**"Time is up, everyone. Let us hear from Team C. Alexandre, what was the primary systemic cause your group agreed on?"**

Official 20-Point Formative Evaluation Marking Rubric

TOTAL: 20 POINTS • 4 CRITERIA (5 PTS EACH)

Assessment is criteria-referenced across 4 instructional and communicative competencies. Student teams are evaluated on preparation, communicative ideas, spoken instruction delivery, and classroom peer engagement:

ASSESSMENT CRITERION	PTS	TEACHER & PEER EXPECTATIONS (CEFR B2 LEVEL • SPOKEN TECHNICAL ENGLISH)
1. Lesson Preparation & Structure Objectives, timing balance & team coordination	**5**	Well-organized 30-minute lesson structure with clear learning objectives; engaging context hook; smooth sequence of steps; balanced, equal contribution across all 3 to 4 team members. **Zero reading from written notes or scripts!**
2. Communicative Activity & Ideas Originality, peer interaction & task design	**5**	Creative, engaging communicative task (role-play, incident debate, audit inspection, or CAP negotiation) that gets classmates actively speaking in pairs/groups; avoids passive lecturing; keeps students invested throughout.
3. Instruction Delivery & Facilitation Clarity, voice projection, ICQs & group monitoring	**5**	Spoken instructions delivered in clear, plain B2 English without confusion; effective checking of comprehension (ICQs) before starting; active circulating among tables to coach peers; confident moderation of the plenary debrief.
4. Technical English & Pronunciation Accuracy, vocabulary activation & spoken fluency	**5**	Natural activation of at least 6 to 8 specialized Module 1 aerodrome terms (OLS, SIB, derogation, Level 1 non-compliance, Swiss Cheese, CAP); intelligible pronunciation and correct word stress; solid grammatical control with functional structures.

Four CEFR B2 Performance Bands

Evaluation standards applied across all student pods during the live teaching showcase:

Exemplary Leadership — 18–20 PTS

Dynamic student leadership; highly engaging communicative activity; crystal-clear instructions; 100% peer speaking engagement; rich technical aerodrome vocabulary deployed naturally; balanced, equal team contribution.

Solid Professional B2 — 14–17 PTS

Good lesson structure; classmates actively participate in pairwork; clear spoken instructions with minor slips; good aerodrome terminology; balanced teamwork; confident handling of the debrief.

Developing Fluency — 10–13 PTS

Overly lecture-heavy; limited pair speaking time; instructions unclear requiring teacher intervention; unequal team participation; occasional reliance on written scripts; terminology applied inconsistently.

Needs Improvement — < 10 PTS

Direct reading aloud from slides or notes; no interactive activity for classmates; severe communication breakdown; silent team members; lack of preparation; insufficient technical vocabulary.

Formative Evaluation 1 Score Breakdown (Teacher & Peer Record)

Structure: _____ / 5 | Activity: _____ / 5 | Instructions: _____ / 5 | Language: _____ / 5

Total FE1 Score: _____ / 20 Points

Evaluator Signature: _____

Live Peer Observation & Scoring Matrix

When other teams are delivering their 30-minute lessons, complete the observation matrix below. Your constructive feedback helps your peers sharpen their professional leadership:

EVALUATION 1 **Team Evaluated:** _____ Topic: _____

Structure: __ / 5	Activity: __ / 5	Instructions: __ / 5	Language: __ / 5

✅ **Key Strengths & Clear Instructions:**

💡 **Actionable Tip for Growth:**

EVALUATION 2 **Team Evaluated:** _____ Topic: _____

Structure: __ / 5	Activity: __ / 5	Instructions: __ / 5	Language: __ / 5

✅ **Key Strengths & Clear Instructions:**

💡 **Actionable Tip for Growth:**

EVALUATION 3 **Team Evaluated:** _____ Topic: _____

Structure: __ / 5	Activity: __ / 5	Instructions: __ / 5	Language: __ / 5

✅ **Key Strengths & Clear Instructions:**

💡 **Actionable Tip for Growth:**

Peer Feedback Golden Rules: Constructive, Specific & Actionable

When delivering spoken feedback to classmates, focus on what you observed rather than personal judgment. Highlight clear instruction delivery (*"Your ICQ on the timebox made the exercise immediately clear"*), praise accurate aerodrome terminology, and offer one practical suggestion for future airside leadership.

Activity 5: Safety Check — Systemic Communication & Briefing Failures

Review the 4 questions in the Safety Check table to analyze how ambiguous spoken instructions, unstandardized terminology, and poor briefings create operational hazards on the airfield:

SIMPLE SAFETY QUESTION	AGREED CLASS ANSWER & REGULATORY STANDARD (EASA PART-ADR.OR.D.015)
1. What is the systemic communication problem?	Airfield operations rely heavily on spoken communication during shift handovers, contractor briefings, and ramp coordination. Ambiguous instructions, inconsistent phraseology, or passive listening create immediate latent hazards.
2. What could happen if uncorrected?	Misunderstood runway closure limits, unclear vehicle routing, or unconfirmed safety exemptions can trigger runway incursions, ground collisions, and unauthorized access to active movement areas.
3. How do we fix it?	Enforce standardized B2 plain English instruction protocols: require explicit readbacks, ask targeted Instruction Checking Questions (ICQs) before work begins, and verify physical understanding rather than assuming compliance.
4. Directorate Operational Decision	Mandate that all aerodrome supervisors, team leaders, and safety instructors complete certified spoken briefing assessments under EASA Part-ADR.OR.D.015, enforcing standardized interactive briefing techniques across all airside teams.

Standardized Spoken Briefing Protocols (Airfield Operations)

Four non-negotiable operational rules for delivering technical briefings on active movement areas:

1. Standardized Plain Terminology

Use established ICAO/EASA aerodrome terms (e.g. *holding point*, *apron stand*, *displaced threshold*). Avoid colloquialisms or local airfield slang that international drivers or contractors might misunderstand.

2. Mandatory Readback Verification

Every critical safety instruction—especially vehicle routing, active runway crossing permits, and work zone boundaries—requires an explicit, verbatim verbal readback before movement commences.

3. Direct Instruction Checking (ICQs)

Verify understanding with direct questions: *"Which taxiway is closed?"*, *"What is the maximum vehicle speed on Apron 2?"*. Never rely on passive head-nodding.

4. Closed-Loop Shift Handovers

Outgoing and incoming airside supervisors must conduct a face-to-face spoken debriefing, verifying open NOTAMs, active work in progress, and unserviceable airfield ground lighting (AGL).

Operational Synthesis: How Did Your Team Ensure Clear Communication?

Explain how your pod used ICQs and structured steps to prevent misunderstanding during your 30-minute lesson:

Activity 6: Operational Notes & Portfolio Debriefing

Log your personal lesson delivery reflections, teacher feedback targets, and key vocabulary directly into your learning portfolio:

1. Team Lesson Delivery & Self-Evaluation

What went well during your 30-minute lesson? How did classmates respond to your task? How well did your team manage pacing?

2. Teacher Feedback & Portfolio Action Plan

Record key feedback points: Spoken technical fluency highlights, pronunciation targets, and specific goals for Module 2:

Top 10 Module 1 Airfield Vocabulary in Action

Key technical terms activated across Sessions 1 to 7:

1. **OLS Safeguarding:** Protecting Obstacle Limitation Surfaces under CS-ADR-DSN.
2. **Displaced Threshold:** Temporary relocation of runway landing threshold due to work.
3. **SIB Advisory:** Safety Information Bulletin issued by EASA for operational awareness.
4. **Level 1 Non-Compliance:** Significant safety finding requiring immediate corrective action.
5. **Corrective Action Plan:** Formal 30-day root-cause remediation roadmap under ADR.OR.D.005.
6. **Swiss Cheese Model:** Systemic alignment of latent organizational and active failures.
7. **Instruction Checking (ICQ):** Targeted questions verifying comprehension before group tasks.
8. **Jet Blast Deflector:** Physical barrier shielding service roads from aircraft engine thrust.
9. **Friction Decay:** Loss of runway macro-texture caused by rubber deposit buildup.
10. **Plenary Debrief:** Whole-class discussion synthesizing student findings and lessons learned.

Formative Evaluation 1 Official Sign-Off Dossier

MODULE 1 COMPLETE

Congratulations on successfully completing Module 1 (Aerodrome Regulations & Safety Operations)! This evaluation validates your ability to lead, instruct, and communicate technical aviation concepts in professional B2 English.
